

ELECTRIC WIPER CONTROL BOX

FUNDAMENTAL PARAMETERS	
Model	TRS-WCB-0001
Operating Voltage	12/24 VDC
Action Mode	High Speed, Low Speed, Intermittence, Water Spray, Stop Reset
Action Frequency	High Speed: 45±5 times/min, Low Speed: 30±5 times/min, Intermittence: Action Once, Stop 2s and Repeat the Cycle
Operating Temperature	-30~60 °C
Dimensions L*W*H	225*225*115 mm
Weight	3.1 kg
TAILORED SOLUTIONS	
Adjustable Electrical Parameters	Can be customized according to specific requirements
Adjustable Scraping Frequency	
Adjustable Dimensions and Weight	
Diversified Control System Design	PLC control system, SCM control system, customized circuit board, control switch... Can be embedded with a set of optional components for your advanced requirements, including a digital counter to monitor the service lifecycle with reference to maintenance needs, a level sensor enabling immediate break of the water pump in the condition of water shortage, multiple protection mechanism and separate power supply module to further enhance the operating reliability
Universal Motor Compatibility	Can operate compatibly with driving multiple types of motors, such as DC motor, AC motor, brushed motor, brushless motor, and so on
